

FAASTeam, Portland FSDO presents:

Aviation Weather Forecasting Downeast Style

Maine has over 35,000 square miles of land, bordered to the west by the White Mountains and to the east by the Atlantic Ocean, and few weather data collection sites from which to create an accurate weather forecast. Join NOAA's Chris Legro as he discusses the science behind assembling an aviation weather forecast and the challenges imposed by Maine's remoteness and geography. Chris Legro is a professional meteorologist working out of the Grey, Maine, NOAA facility and is the Aviation Weather Focal Point for that station. Click the link below to register TODAY.

Directions: From US Route 1, follow Rt 144 1/2 mile, turn right onto Chewonki Rd, 1/4 mile on left. Seminar will be held in Tan Colored terminal building. Additional parking is available further down Chewonki Rd in the lot with the airport beacon.

Follow Map Link provided in Additional Information section of this announcement.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
